

Contents

Schrott, L. & Hördt, A.: Preface: Geophysical Applications in Geomorphology .	V–VII
---	-------

Theoretical issue

Ballantyne, C. K.: Paraglacial landform succession and sediment storage in deglaciated mountain valleys: theory and approaches to calibration (with 6 figures) . . .	1– 18
--	-------

DC-resistivity

Etzel Müller, B., Berthling, I. & Ødegard, R. S.: One-dimensional DC-resistivity depth soundings as a tool in permafrost investigations in high mountain areas of Southern Norway (with 8 figures and 1 table)	19– 36
Kneisel, Ch.: Electrical resistivity tomography as a tool for geomorphological investigations – some case studies (with 7 figures and 1 table)	37– 49
Sass, O.: Moisture distribution in rockwalls derived from 2D-resistivity measurements (with 11 figures and 3 tables)	51– 69

Seismic refraction

Hoffmann, Th. & Schrott, L.: Determining sediment thickness of talus slopes and valley fill deposits using seismic refraction – a comparison of 2D interpretation tools (with 7 figures and 3 tables)	71– 87
Hecht, St.: Differentiation of loose sediments with seismic refraction methods – potentials and limitations derived from case studies (with 11 figures)	89–102

Other methods

Berthling, I., Etzel Müller, B., Wåle, M. & Sollid, J. L.: Use of Ground Penetration Radar (GPR) soundings for investigating internal structures in rock glaciers. Examples from Prins Karls Forland, Svalbard (with 5 figures and 4 tables)	103–121
Hördt, A. & Zacher, G.: The radiomagnetotelluric method and its potential application in geomorphology (with 10 figures)	123–143

Combined applications

Kneisel, Ch. & Hauck, Ch.: Multi-method geophysical investigation of a sporadic permafrost occurrence (with 5 figures)	145–159
Hauck, Ch. & Vonder Mühl, D.: Evaluation of geophysical techniques for application in mountain permafrost studies (with 2 figures and 3 tables)	161–190

Addendum

CD-ROM: Demo-version Reflex version 3.0 (incl. handbook) and introduction to modelling and interpretation tools by K. J. Sandmeier
